SET OR RESET ONELOGIN PASSWORD

1. DTS faculty, students and grads use their OneLogin accounts to authenticate access to library databases. OneLogin accounts are created automatically for new students at least two weeks before their first semester begins. To set a new password, go to https://dts.onelogin.com/login.

2. The Log-In screen will appear. Click the “Forgot Password” link beneath the “Log In” button.

3. When prompted, supply your email address or DTS ID number and click “Continue.”

4. An automated message will be sent to the email address in your OneLogin account. The message usually arrives within a couple of minutes. It is sent by noreply@onelogin.com. The message contains a link that will let you securely reset your password. Click the link.

5. The password reset screen will appear. Enter a new password of your choosing as per instructions on the screen. You may login immediately.

If needed contact IT (helpdesk@dts.edu or 214-887-5230) for help.
