

HOW TO ACCESS THAT JOURNAL

By Debbie Hunn

Most of the journals available from the library are included in the WorldCat Journal List. It provides links to online journals and information about print journals. Use this resource if you **already have a citation to a specific article and you want to know if and how you can access it**. For example, use this resource if you see an article in footnote and you want to get the article. You can link to the journal list in a variety of ways.

- from the top right menu in WorldCat (pick Library Links → Journals/Serials)
- from the database list: <http://library.dts.edu/databases>
- directly: <http://library.dts.edu/journal-lookup>

Retrieving your article is a multi-step operation. For example, suppose you want to read “The Semantic Fields of Seeing and Oral Communication in the Joseph Narrative” by Talia Sutskov in *Journal of Northwest Semitic Languages*, volume 33 no. 2 (2007), pages 33-50. Then you would proceed as follows.

1. Connect to the journal list. Be sure the “**Journals**” button is selected, not the “Articles” button.
2. Search by **journal title** (Journal of Northwest Semitic Languages in this case).

The screenshot shows the search interface for journals. At the top, there are two tabs: "Search" (which is active and highlighted with a purple underline) and "Browse". Below the tabs, there is a "Search for:" section with four buttons: "Articles", "eBooks", "eBooks Citation", and "Journals" (which is selected and highlighted in dark grey). Underneath, there are two radio buttons: "Title:" (which is selected) and "ISSN:". To the right of the "Title:" radio button is a text input field containing the text "journal of northwest semitic languages". Below this is a "Search type:" section with a dropdown menu set to "Starts with". At the bottom, there is an unchecked checkbox labeled "Search print holdings only".

3. You will retrieve one or more options on the left. In the example below there are two options because there are two different ISSNs. The first says “in library” meaning it will provide information about print volumes of the journal in the library. The second says “full text” meaning it will provide information about online content. On the right we see print

coverage goes from 1971 to present.

The screenshot shows a search results page with two columns. The left column contains two search results for 'Journal of northwest semitic languages'. The top result is a 'Journal, magazine' with ISSN: 0085-2414 and 'In library (1)'. The bottom result is an 'eJournal/eMagazine' with ISSN: 0259-0131 and 'Full text (1)'. Below these results is a 'Language:' section with links for various languages: Čeština, Deutsch, English, Español, Français, Italiano, Māori, Nederlands, Português, Svenska, 日本語, and 한국어. The right column shows the detailed view for the top result. It includes an 'INFO' icon, the title 'Journal of northwest semitic languages', the ISSN: 0085-2414, and a 'Print copies at your library' button. Below that, it lists 'Available from' and 'Turpin Print Journals' with a link to the journal page. The coverage is listed as '1971-present'.

4. Click the title of the second record on the left to see the options under it. In the image below we see online coverage runs from 2000 to present.

The screenshot shows a search results page similar to the one above, but with the second result selected. The left column shows the same two search results. The right column shows the detailed view for the second result, 'Journal of Northwest semitic languages', which is an 'eJournal/eMagazine' with ISSN: 0259-0131. It features a 'Full text availability for this item' section with a 'Full Text Available' status. The coverage is listed as '2000-present; volume:26-present; issue:1-present'. There is also a 'Report a problem accessing this item:' link.

5. Each element of a list you generate on the right includes the date range of the full-text articles for the journal in that database. Check your citation to see if the article is available from the library. "The Semantic Fields of Seeing and Oral Communication in the Joseph Narrative" is in Sabinet and in the Turpin print collection. Click the journal title in the Sabinet record,

rather than the name of the collection.

Full Text Available Journal: [Journal of Northwest semitic languages](#) 
Collection: [Turpin Sabinet Religion](#)
Coverage: 2000~present; volume:26~present;issue:1~present

6. This will take you to the page for *Journal of Northwest Semitic Languages* in Sabinet. Click the link for Previous issues.
