Index Browse

Index browsing allows the user to view all values that occur in specified fields in a database, along with corresponding hit counts. Access the index browse feature by clicking the green "Indexes" button on the upper portion of the "Advanced" search screen. Use the drop-down menu to choose an index to browse. Indexes can also be searched using tags. Since browsable indexes are phrase indexed, the exact form and spelling of terms as they appear in the database must be used in conjunction with the tags when entering a search manually. Indexes available for browsing in *Atla Religion Database with AtlaSerials PLUS* database are listed below. Tags for all fields included in the index browse feature begin with "Z" (e.g. "ZA" for Author).
